Ze-Yu Xing

PhD Candidate in Physics · Institute of Physics, Chinese Academy of Sciences
Beijing, China · Website · Google Scholar · ORCID · GitHub

Research Profile

My research explores novel phenomena in quantum systems far from equilibrium, particularly in open quantum systems and quantum many-body dynamics. I am interested in the principles governing collective behavior and relaxation, and in how information theory and probability can deepen our understanding of these phenomena. Looking ahead, I aim to explore how AI can advance theoretical discovery and how insights from physics can contribute to quantum computing and new approaches to learning and computation.

Education and Affiliation

Institute of Physics, Chinese Academy of Sciences Aug. 2022 - Present
PhD Candidate in Physics *Beijing, China*
Jilin University Aug. 2018 - Jun. 2022
B.Sc. in Physics, Honors Program in Science *Jilin, China*
GPA: 3.88/4.00 (93.2/100).

Research Interests

Non-equilibrium quantum dynamics · Open quantum systems · Quantum many-body physics · Non-Hermitian physics · Statistical mechanics · Quantum information and simulation

Ongoing Research Projects

OYA-OQS: Liouvillian Lieb-Schultz-Mattis Constraints in Open Quantum Systems
Investigating spectral constraints in translationally invariant open quantum many-body systems with strong U(1) symmetry. The project combines analytical Weyl-sequence arguments with momentum-resolved exact diagonalization and tensor-network simulations of dissipative spin chains.
ssb-qme: Symmetry-Enforced Strong Quantum Mpemba Effect
Developing a symmetry-based mechanism for strong quantum Mpemba effects in symmetry-broken open systems. Current work studies discrete parity and continuous U(1) symmetries through Liouvillian analysis and quantum-master-equation simulations.

Publications and Preprints

Geometry-adaptive formulation of non-Bloch bands in arbitrary dimensions and spectral instability 2026
Ze-Yu Xing, Yuncheng Xiong, and Haiping Hu
Communications Physics 9, 127 (2026) · arXiv:2407.01296 (2024)
Ze-Yu Xing and Yuncheng Xiong contributed equally.

Universal spreading dynamics in quasiperiodic non-Hermitian systems 2025
Ze-Yu Xing, Shu Chen, and Haiping Hu
Physical Review B 111, L180203 (2025)

Honors and Awards

Ny Tsi-Ze Scholarship, Institute of Physics, Chinese Academy of Sciences 2020
Honorable Mention, Mathematical Contest in Modeling, Consortium for Mathematics and Its Applications 2020
National Scholarship, Ministry of Education, People's Republic of China 2019
Outstanding Student of Jilin University, Jilin University 2019
